Areas of Specialization

- Potable Water Sampling
- Geological and Pedological Interpretation
- Hydrologic Testing

Overview of Experience

- Field Camp (Clemson University) - Topics included: spatial mapping, well drilling, water quality and sampling, stream gauging, well testing, and soil classification
- Conducted a water analysis of samples from the New Jersey Pine Barrens and compared the samples based off of TDS, ORP and pH.
- Collected soil samples from Eastwick Park, Pa. near a former landfill and analyzed chemical concentration with XRD and XRF. Various depths were sampled to determine if a correlation between depth and chemical/mineral composition was present.
- Sampled potable water in order to test for metals and other contaminants of concern.
